

BUNGIE

Bungie is a 16 HH Anglo Arab gelding, with many great horses such as Citation and *Bask in his pedigree. I purchased him as a 4 year old sight unseen, and without even seeing a photo of him, I headed to California to pick him up. Little did I realize that I had just purchased the horse of a lifetime.

He has wins in both endurance and competitive, as well as best conditions, high scoring part arab, and versatility awards, and competes well in both single and multi-day events. He completed the Race of Champions and Old Dominion in the solo and cavalry divisions, without a crew.

His most efficient gait is a long striding, almost effortless gallop. He can stay in this ground covering "cruise" speed mile after mile, with consistently low P&R's. Unlike most competitive riders who trot most of the time, I allow Bungie to use this cruise speed for both endurance and competitive, (simply shifting gears to a higher "cruise" for endurance.) I have never run him to his full potential, as I have been able to win or accomplish my goals using only a portion of his abilities.

Jerry says I have a rule of "whatever Bungie wants, Bungie gets," and although it is not entirely true, friends have told Jerry that he should hope to come back in his 2nd life as Bungie.

I feel truly blessed to be allowed to share the life of such a great horse.
